

# The most complete digital solution for your dental practice

In association with

**3shape** 

# ukdentech, the UK's most advanced digital dental lab, has made it easy for you to go digital with **ScanPlan**.

**ScanPlan** is ukdentech's full digital package which consists of a top-of-the-range **3Shape TRIOS** scanner combined with our proven **Digital Implementation Plan** which has been perfected in over 50 TRIOS scanner installations.

**ScanPlan** has been developed to ensure that you realise the full potential of digital dentistry, maximise efficiencies and boost your practice profitability.

**3Shape TRIOS  
Scanner**

- Best-in-class TRIOS intra-oral scanner.
- Everything you will need for your digital journey.

**Installation and  
Onboarding**

- Step 1 of your digital journey is a full installation and training program for your whole team.

**Nurturing and  
Development**

- Our on-going commitment to your professional development in digital dentistry.

The key to digital success is having a **comprehensive implementation plan**

The most challenging aspect to adopting the new technology was the start up and initial use of the scanner. The training given by **ukdentech** has made the transition seamless. Their continued support be it hands on, digital and by means of seminars has been exceptional.

**Dr Andreas Kerschbaumer**

3Shape TRIOS Scanner

## WHY 3SHAPE TRIOS?

In our view, the 3Shape TRIOS is much more than a digital impression-taking tool. With a unique range of software applications, it promotes greater patient engagement and can enable you to dramatically increase case acceptance.

It is extremely intuitive, easy to learn and can be used across the widest range of indications,

## INSTALLATION AND ONBOARDING

Our aim is for you to achieve a **successful implementation** way beyond installation.

Our digital training and implementation team will guide you through 6 phases of continual feedback and development:

“ The training and support from **ukdentech** has been exceptional  
 Dr David Guppy

## WHY WORK WITH UKDENTECH?

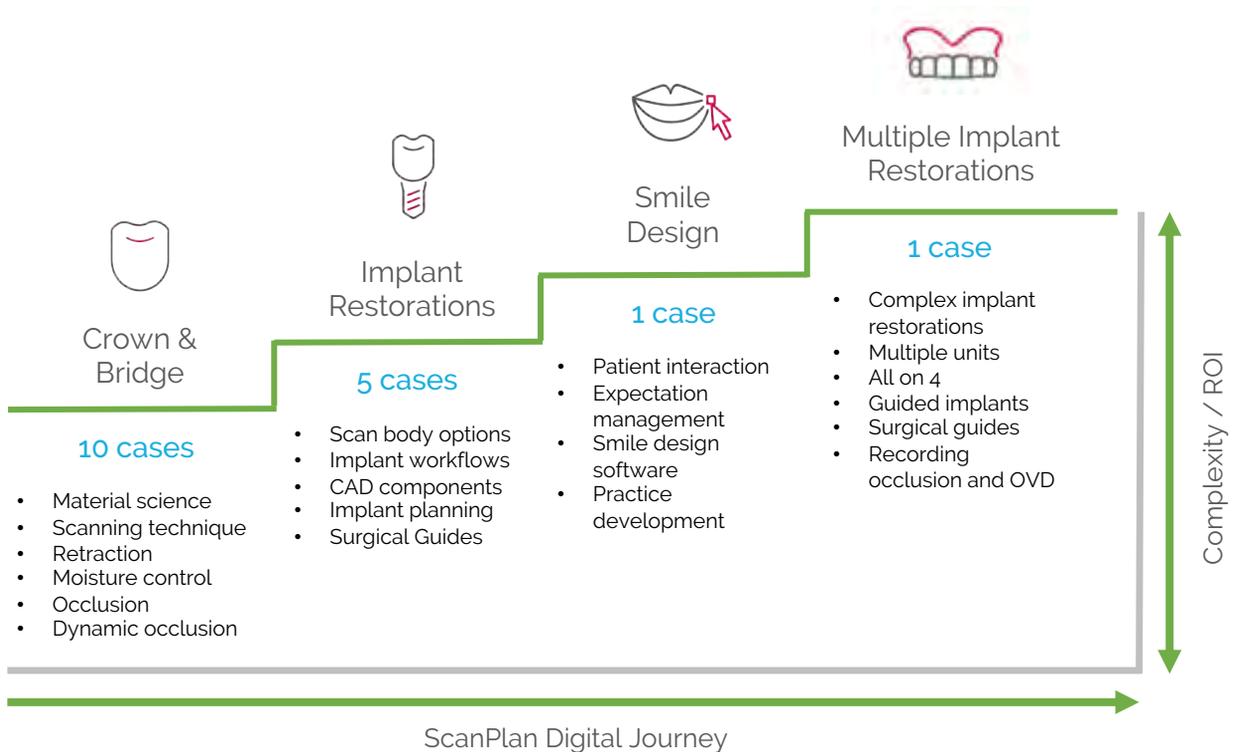

In order to take advantage of ScanPlan, we are asking for you to work with us:

- £1,000 minimum lab spend per month with ukdentech for 36 months.

This has been developed to support your graduation through the various levels of complexity within digital dentistry. Like any new skill each stage of your journey expands your knowledge and introduces new considerations., Our technicians and training staff are here to guide you on each step of your journey.

Your scanner is completely open and from day one you can use as many providers as you wish.

What does £1,000 lab spend look like for each case type? And what will your learning outcomes be?

The fit of the restorative work from **ukdentech** is fabulous!  
So far, I have only had to adjust the occlusion once out of approximately 80 cases.  
The fit appointments in my diary take 50% less time than before

Dr Matthew Nolan

At **ukdentech**, we recognise that dentistry is going digital...

We have invested heavily in our state-of-the-art, medical device manufacturing facility to put ourselves in the best possible position to service your needs as you move into the digital age.

We are committed to customer service and quality and to ensuring that you get the most out of everything that digital dental technology and workflows have to offer.

In order to combine accuracy and predictability of fit with the ultimate in aesthetics, we have aligned our digital manufacturing processes with **Zirkonzahn®**. We use their most advanced M4 milling machines, software and **Prettau®** zirconia to produce beautiful looking restorations that fit first time, every time.

Our ambition is to make going digital as accessible and as smooth a transition as possible for our clients and this is why we developed **ScanPlan**; a top of the range **3Shape TRIOS** scanner combined with our unparalleled **Training and Implementation Program**, all backed up by our expertise and proven digital workflows using the best quality materials from **Zirkonzahn®**.

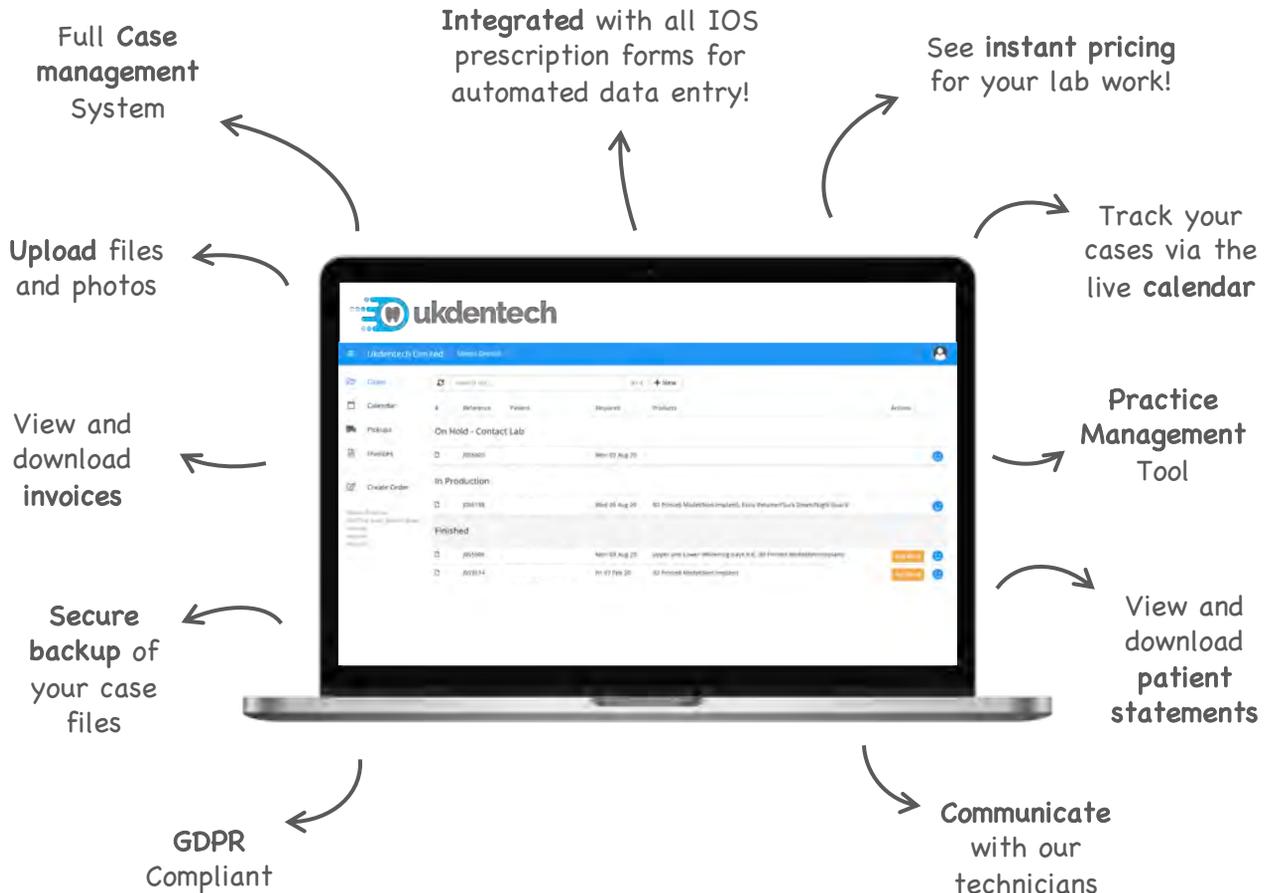

Let's go digital together!
